LOCAL ITEMS

Mr. Powell is a Calgary visitor
this week.

Born—On Saturday, July 28,
to Mr. and Mrs. J. C. Turple, a
son, at Cereal hospital.

Mrs. W. S. Butts, of Calgary is
visiting at the home of her parents
Mr. and Mrs. J. Massey.

Mrs. B. Dobson returned on
Friday from Boulder, Colorado,
where she visited her son, F.
Dobson.

J. R. Girvin, of Deloraine, Man-
itoba, visited over the week end
at the home of his sister, Mrs. W.
W. Isbister.

Mrs. J. Morris and two children,
of Calgary, spent the week end
with the former's parents, Mr. and
Mrs. R. Peyton.

Mrs. Stacey Gustin, of Saskat-
oon, is visiting at the home of
her parents, Mr. and Mrs. August
Jacobson of Heathdale.

Mr. and Mrs. F. Goodwin, of
Collins, Montana, visited at the
home of the latter's aunt, Mrs. R.
Peyton, over the week end.

Mr. and Mrs. Mosier, of Cal-
gary, arrived in Chinook on Fri-
day and is visiting for a short
time with G. Ray Robinson.

The builders who are erecting
the Cooley Garage are rushing the
work along, as the building is
already making a fine showing.

Mr. and Mrs. W. S. Lee and
family, Mrs. Rutley and Mrs.
Bassett returned on Saturday,
after having spent a two weeks
vacation at Banff.

G. Frederickson and son, who
have been visiting Lloyd Robin-
son and other friends in the dis-
trict for a short time, left for Trail,
B.C., on Tuesday.

Miss Celia Peyton, who has
been teaching school at Leth-
bridge, returned home on Satur-
day to spend the vacation with her
parents, Mr. and Mrs. R. Peyton.

Mr. and Mrs. R. D. Vanhook
and family returned from Banff
the first of the week, where they
report having had a most enjoy-
able holiday for the past few
weeks.

Our local sign painter, Duncan
Roberts, has painted four fine
signs on business houses in town,
the Meat Market, the new Barber
Shop, S. H. Smith's Harness Shop
and the National Cafe.

Make your entries for the hor-
se shoe pitching contest in con-
nection with the Fall Fair Friday,
Aug. 3. The prize, donated by
Robinson Bros., Blacksmith, Chi-
nook, is a set of silver and gold
painted Quoits Shoes.

E. J. Ellis, of the Collingwood
district, sold a fine Shorthorn bull
to F. M. Sutor last week. The
registered name of this animal is
Songster, and he is a son of Up-
namar, the winner of reserved
champion 1923 at Calgary.

Mr. and Mrs. H. W. Butts and
baby returned home on Saturday
after a two weeks' visit with
friends near Red Deer. They
were accompanied on their return
by Miss Elsie Thompson, who
will visit here for a short time.

The school board has had the
bell which was presented to the
school by the Woman's Institute
erected, the roof of the building
has been recovered and painting
and all other necessary repair
work is being done during the
vacation.

Miss Margaret Bayley returned
on Thursday to Mr. Hurley's
store after having had her vacation

Mr. and Mrs. Elliott, of Kin-
dersley, spent the week end at the
home of the former's brother, O.
B. Elliott.

Mrs. P. R. Dobson and family,
of Calgary, are spending their
vacation at the home of Mrs.
Dobson's parents, Mr. and Mrs.
F. Otto.

Miss Morrison, of Austin,
Mass., who has been visiting her
brother, Mr. N. D. Morrison and
sister Mrs. McKinnon for the past
three months, left for her home
on Wednesday.

A number motored from town
to the Hand Hills stamper on
Wednesday of last week. Among
those who went were Mr. and Mrs.
W. W. Isbister, Mrs. Gingles and
family, Mr. and Mrs. Dresse,
Marvel Milligan and a number of
other young people.

Mr. and Mrs. W. M. Crockett
and son George, of Youngstown,
Mr. Young, teacher at Dobson,
and Mr. and Mrs. Lord, of Prince
Edward Island, who are spending
a vacation at the home of their
daughter, Mrs. Crockett, were
Chinook visitors on Sunday.

Mr. and Mrs. S. A. Wilton wish
to thank all those who were so
kind in helping at the time of the
death of their little son, Arvin,
during the absence of his parents.
The funeral service will be held
Sunday, Aug. 12th, at the Rear-
ville school house at 3 p.m. Mr.
Frost, Minister.

The U. F. A. and U. F. W. A.
Acadia Provincial Constituency
Convention will be held on Tues-
day, Aug. 7, in Youngstown, com-
mencing at 10:30 a.m. Addresses
will be given by Hon. J. F. Lym-
burn, Attorney General; William
Irvine, M.P.; Robert Gardiner, M.
P., and a speaker from the Wheat
Pool.

A Horseshoe Pitching Contest
will be held in connection with the
Chinook Fall Fair on Friday, Aug.
3. Not less than three teams to
enter. No entry fee. The prize,
a set of silver and gold painted
Quoit Shoes, donated by Robin-
son Bros., Blacksmiths, Chinook,
to be played off for by the winning
teams.

Curling Rink Blown Down

An electrical storm, accom-
panied by a terrific wind and heavy
rain, passed over this district last
Sunday evening about nine o'clock.
Crops in some places were badly
lodged by the high winds. Slight
hail fell during the storm, but as
far as known no great damage
was done.

The curling rink was blown
over and the side walls badly
smashed. This rink was built in
1914 at a cost of \$1200. It was
150 feet long by 40 feet wide.

It was particularly unfortunate
that this building was wrecked at
this time, as the annual fair takes
place on Friday and this building
was being used as an exhibition
hall. The directors have made
arrangements to use the school
hall for exhibition purposes this
year. It is unfortunate that the
school is such a distance from the
fair grounds, but it is the best
arrangements that could be made
under the circumstances.

The rain came at a very op-
portune time, as crops in this district
were ripening up very fast from
the extreme heat. The rain will
assist considerably in the filling
of the grain and will assure a more
bountiful harvest.

Our Repairs Save Tires

Our repairs are made by
Firestone factory methods—
in other words, the injured
section of your tire is recon-
structed just the same as the
tire was built originally.

The injury is therefore
eliminated and your tire is
restored to the same good
condition—it had before it
was bruised, cut or blown.
Our prices are very reason-
able.

Cash Register Burglary

Last Friday night thieves broke
into the pool hall owned by H.
W. Butts and robbed the cash
register of about \$30.00 in silver.
Some bills in the register were
overlooked by the robbers. En-
terance was made to the building
through the coal cellar. Const-
able Torpey was notified of the
case, and it is expected that ar-
rest of the miscreants will soon
follow.

Chinook and Oyen baseball
teams crossed bats in Oyen at the
fair last Monday and a good
fast exhibition of ball was put up
on both sides. The new pitcher
for Chinook showed up good, and
the hitting was very good, but
costly errors by three Chinook
players gave their opponents the
upper hand. The score stood 7
to 5 in favor of Oyen at the finish.

WORLD HAPPENINGS
BRIEFLY TOLD

Japan has announced unconditional acceptance of the American anti-war treaty.

H.R.H. Prince George has been appointed to H.M.S. Durban as an interpreter in French.

P. C. Caverhill, chief forester for British Columbia, will go to Australia to represent British Columbia at the British Empire forestry conference there.

Alaska now has more than forty landing fields for airplanes, and plans are under way for the construction of sixteen more, according to P. C. Crawford, of Fairbanks.

It is probable that Premier King will go to Geneva, in September, as a Canadian delegate to the League of Nations assembly and also as a member of the council of the League on which Canada now has a seat.

Leaders of the Arab Congress presented Lord Plumer, the high-commissioner, a demand for the institution of democratic rule in Palestine. Lord Plumer promised to take up the question at his visit to London.

French attorneys have entered protest against the "morally reprehensible" conduct of United States in regard to the "foreign divorce bill." The protest was sent to the American Bar Association.

An air mail stamp will be issued in Canada soon. The stamp has been approved by Hon. P. J. Veniot, post-master-general, and the denomination has not yet been decided upon. The stamp will be used on air mail routes now in operation.

The steamship North Shore has sailed from Quebec, prepared to stop at Greenley Island and at Long Point in the mainland to pick up the dismantled trans-Atlantic plane Bremen and bring it to Quebec City, where the plane will be reassembled and placed on exhibition for a short time.

The Newest Airship

Germany Is Proud Of Her New Super-Zeppelin

Behind the ceremonies attending the christening of the huge airship LZ-127, at Friedrichshafen lay a significance far greater than a brief cable dispatch could indicate. They symbolized not only German pride in the completion of a new super-Zeppelin, but German aspiration for a renewed leadership in what many experts regard as an important future element in aviation—lighter-than-air transport.

The LZ-127, christened "Count Zeppelin," is now the world's largest completed airship. It can carry a greater "pay load" than any air vehicle in existence. Because of a wide travelling radius, it and others similarly large are expected to become in time the trans-ocean carriers of mail, express and passengers.

Germany is not alone in the construction of new super-zeppelins. In England even larger airships are being built, one for commercial purposes, with the idea of shortening travel time between London and Colonial possessions.

In the United States design data and bids have been asked for two new giants of the air to be used by the navy. It is, however, on the commercial possibilities of lighter-than-air craft that modern thought now centres.

Bernard River

Interesting Story Of How This Western Stream Got Its Name

In 1928 Sir George Simpson, governor of the Hudson's Bay Company crossed Canada from east to west by way of Peace River. At half-past six on Sunday evening, September 7, the travellers laid aside their paddles to camp for the night at the mouth of a small tributary to Peace River, not far below where the latter river divides into two main branches, the Finlay and the Parsnip, in disembarking from large canoes, passengers had generally to be carried from the canoe to the shore. Sir George Simpson's guide, Bernard, was carrying the Governor ashore when he fell with him into the water. Since that day the river has borne the name Bernard and all that is known of the guide is that he was the principal figure in this incident. The name Bernard River has just been approved by the Geographic Board of Canada.

Where Begging Is Prohibited
Begging is prohibited in Lima and Callao. An order recently issued by President Leguia states that, in view of the completion of a beggars asylum by the Lima Society of Public Benevolence, capable of caring for 200 persons, any body found soliciting alms will be arrested.

W. N. U. 1744

Automobiles As Settlers Effects

May Be Imported Without Sales Or Excise Tax Under Certain Conditions

Certain officers of National Revenue have apparently had difficulty in deciding whether or not excise and sales tax applies on the importation of automobiles as settlers' effects, having in mind that Tariff Item 705a provides for the exemption of duty on the amount in excess of \$1,000 on motor vehicles imported as settlers' effects.

In order to clarify the situation, the Department submitted the question to the Department of Justice for an opinion as to whether or not the exemptions in Schedule 1 and 3, Chap. 170, Revised Statutes of Canada, had the effect of exempting cars entered as settlers' effects in total, or only to the value of \$1,000 each.

The Department of Justice has held that automobiles entered as bona fide settlers' effects may be imported without the imposition of either sales or excise tax. These cars, however, are subject to the regulations and restrictions by the Customs Division with respect to length of ownership prior to importation, and length of retention after importation.

How a Town Prospers

Four Things Which Must Be Done To Ensure Success

"George Brown, the great pioneer publisher of Toronto, addressed a Presbyterian audience in a little town, saying: 'If you want your town to prosper there are four things that must be done:

(1) You must buy from your local merchants.

(2) You must uphold the character of your local manufacturers.

(3) You must support your schools and churches liberally.

(4) Above all you must give an ungrudging support to your local newspaper.

If you do these four things, and do them well, your town will one day be a city.' His audience followed his advice and their town has become a city.

Winnipeg Newspaper Union

The blazer is decidedly smart this season and is shown here in two views worn over a chic one-piece frock. View "A" is fashioned of striped flannel and has a notched collar, patch pockets, and long two-piece sleeves, while view "B" is of plain and contrasting material and has rounded lower front edges. No. 1627 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2 yards 36-inch, or 1 1/2 yards 54-inch material; 1/4 yard additional 36-inch contrasting for view "B." Price 25 cents the pattern.

The frock has plaits and a yoke at front and back a high neck with shaped collar, or square neck, long sleeves gathered to wristbands, or short sleeves with cuffs, and a belt. No. 1542 is in sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards 36-inch, or 2 yards 54-inch material. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dresser. Price of the book 10 cents the copy.

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued.)

It was a pleasure to see the fine type of young men who were on this farm, vigorous, keen, hard working, who only too evidently were anxious to "make good" in Canada. The progress they had made was good, so much so that one of our party declared that the ploughing he had seen that day by former city workers would put to shame some so-called experienced ploughmen. Another declared that he would willingly concede, at current wages, men who proved capable as the young fellows he had seen that day. And still another took off his coat and gave the young men an object lesson in the swinging of an axe. Afterwards we were addressed by Mr. H. Belterton, Under-Secretary to the Ministry of Labor, who asked us for our frank criticisms. Truth to tell, from our day's observations, there was little to criticize, for we were glad to recognize and commend an experiment which was so worthy in its aim.

An amusing but useful device was a number of rubber duds filled with water. These are used in the first stages of teaching milking. An historic fence of the Weston Hall estate was the remains of a mounted castle built by the son-in-law of William the Conqueror.

Back in London, after having luncheon on the train as guests of the Ministry of Labor, we were accorded yet another high privilege, an informal reception at 10 Downing Street, by the Prime Minister, Mr. Stanley Baldwin, and Mrs. Baldwin. Dignified, plain, simple, nothing could be more expressive of the British character than the unpretentious house which Great Britain allows to her Prime Ministers. As with the house, so with Mr. Baldwin. The greeting given to us by the Prime Minister and Mrs. Baldwin was direct and sincere. We might have been visiting the home of an old friend. And it was as a friend that Mr. Baldwin spoke to us. Frankly and straight out he told us of Britain's unemployment difficulty and appealed to us as fellow-citizens of the Empire to help so far as we could in the solution of the great problem to the mutual advantage of Great Britain and Canada. That we had investigated the Braden experiment and had found it good was gratifying to him. He acknowledged it was not to be prejudiced because these men had been unemployed for a fairly long period. Unemployment had been their misfortune, not their fault. They were willing and sound at heart. All they needed after their training was a little encouragement. He hoped we would see, so far as we could, that the encouragement was given to them when they got to Canada.

"Who of us would have dreamed, when starting on our tour that, before we went back, we should enter the cabinet room of 10 Downing Street, the Inner Council Chamber of the British Government, where so many momentous decisions have been made, affecting not only the Empire, but the world itself, that in that room we should be able to win the confidence of the Prime Minister of Great Britain, that he would ask our goodwill in favor of a great experiment, and that we should be able to help, if we wished, in a great Empire purpose!"

We had still another appointment

before this fascinating day was ended. The Imperial Institute had invited us to dinner, where we were to meet the representatives of the woolen industry under the chairmanship of Mr. Frederic A. Actroyd, a large woolen manufacturer of Bradford. A genuine host, he was followed by Mr. Actroyd, was followed by addresses exhorting the Canadian farmer to grow long wool sheep which would meet the particular requirements of the British woolen trade. The challenging remarks of our hosts were met with stout defence by Mr. Arkell, of Canada's present policy in breeding more of the short-wooled breeds for meat primarily on account of the premium to be secured on the markets of the United States. This added spice and stimulus to a delightful evening. Everywhere we were shown over a section of the Institute devoted to Dominion displays.

One more day and then "goodbye" to London, but before actually leaving we were to receive an unexpected honor, an unexpected invitation, and our greatest thrill of the tour, a flight to see the wonderful acrobatic, the largest and best equipped in the world.

The unexpected honor came from the Imperial Institute, who were accorded a special place from which to view the Majesty's procession to Westminster for the opening of Parliament. It was a privilege to see the wonderful state coach go by accompanied by all the pomp which marks this important ceremony. Our only regret was that Her Majesty, for the first time in the reign of His Majesty, was unable, through indisposition, to accompany the procession. Her Majesty, however, was able to appear on the balcony of the Palace with the Duchess of York, and the little Princess Elizabeth.

Our unexpected invitation came from Mr. George Robey, the famous comedian, who had reserved seats for the whole party at the Princess Theatre, where we saw his revue, "Bits and Pieces," prior to its being cancelled. Our only regret was that we were invited "back stage" to meet Mr. Robey and his leading lady.

The aeroplane aspect of our flight at Crofton was of the "Silver Wing" type, a luxurious air liner capable of carrying 11 passengers. The aeroplane was a masterpiece of engineering. She was equipped with 1200 horsepower. She was capable of 100 miles an hour in still air, was furnished with built-in fuel tanks, and carried a buffet and waiter on her long trips. Let it be said at once, that more than one of us hid a secret nervousness which we wouldn't admit, no not for worlds! We need have felt no qualms! In the hands of Captain Olney, our cheery little pilot, she rose like a bird, up she climbed until she reached 3,000 feet. Below us surely was not great London, but the land of Edgworth Road, its busy streets and ribbons for roads. Those two little spindles like the legs of a brass bedstead, the towers of the Crystal Palace. Paved by the wind we were travelling 110 miles an hour; it seemed like 20, so slowly moved the landscape! Soon, all for our quarter-of-an-hour in the air was ended. In a long graceful glide we slid to earth, landing lightly as this tidiedown, then skimming along the ground to the place of debarkation. It was wonderful, exhilarating experience in more senses than one, a "high spot" in the tour!

(To Be Continued.)

The stamp clerk often weighs other people's words.

Proposed U. S. Legation at Ottawa

How the new United States Legation at Ottawa will look. American architects have drawn plans for the building. The site will be adjacent to the Rideau Club, fronting Parliament Hill, where two buildings will be demolished to make room for the new structure. The site cost the United States \$104,000 and the building will cost about \$350,000. This does not include quarters for the minister and his family and staff as is the case with the Canadian legation at Wash-

ington. Canada's Washington legation cost \$500,000, including furniture and everything complete. The United States diplomatic service still has to provide the minister with a residence, so the housing cost of the United States Legation at Ottawa will far exceed that of Canada in Washington. The first floor of the new building will house the consular staff, the second the minister and the diplomatic staff, and the third floor the commercial attaché and his staff.

SUNDAY SCHOOL LESSON

AUGUST 5

PAUL IN A PAGAN COUNTRY

Golden Text: "I know how to be abased, and I know also how to abound."—Philippians 4:12.

Lesson: Acts 14:1-28.

Devotional Reading: Matthew 5:10-16.

Explanations and Comments

A Cripple Cured At Lystra, verses 8-10.—At Lystra Paul and Barnabas were face to face with stark paganism. Apparently there were no Jews in the city, and few Romans. There being no synagogue, Paul began to preach outdoors. One day he noticed, on the ground near him, a lifelong cripple, who was listening with an eager attention that revealed to the apostle a faith which was sufficient for the man's healing. Suddenly Paul interrupted his address by commanding the man, in a loud voice, "Stand upright upon thy feet!" Up sprang the cripple, able to walk. Compare Jesus' words to the man with a palsied arm, "Stretch forth thy hand!" (Matthew 12:13) In each case there was immediate cure.

The cripple of Lystra looked upon it as a great material miracle, but the deeper fact was the spiritual miracle lay behind it; the cripple's apprehension of the truth, and the application of it to his own case; the preacher's knowledge of it, and his earnestness of spirit in the man's operation of faith in the living Lord. That was the wonderful thing.—G. Campbell Morgan.

Announces Arts Competition

Viscount Willingdon To Donate Prizes Totalling Thousand Dollars

Announcement that His Excellency Viscount Willingdon purposes awarding prizes amounting in all to \$1,000 for competition this year in music, drama, painting, and sculpture, will occasion much appreciation in all being in Lystra throughout the Dominion. In music there will be one prize of \$200, and two prizes of \$100 each; drama, one prize of \$200; painting, one prize of \$200; and sculpture, also one prize of \$200.

These gifts indicate not only His Excellency's interest in the arts in Canada, but also his interest in Canada generally. It is a practical interest of a type that will appeal. The competition which he is inaugurating should do not a little to develop talent and engender skill in the arts, and it is to be hoped the west will be heard from in the contest.—Regina Post.

Admits Of No Argument

Money Spent In Advertising Is Gifted Investment

The local merchant who fears to spend his money on advertising, should never read the life story of John Wanamaker. If he does, he will have to revise his own life completely.

In a recent address made by Arthur Williams, Vice-President, the New York Edison Company, the speaker remarked apropos of John Wanamaker and his first venture into the retail business: "It is notable, and perhaps prophetic of modern business, that of the first day's receipts of \$24.87, \$24.00 were spent for advertising, 67 cents being retained for convenience in making change the next morning." There is an argument as to whether or not this was a wise proportioning. There is no argument, however, as to the ultimate business success of the advertising Wanamaker.

New Born Settlements

New Townships Springing Up In The H.B.C. Area

New born settlements in Northern Canada are having rapid growth. Mining operations at Cranberry Portage, Cold Lake and Flin Flon, and the demand of the Western Prairies for a shorter train haul to the ocean, are the main causes for the building of the Hudson Bay Railroad new under construction by the Canadian Government and the Canadian National Railways. Stores, hotels and growing towns are quickly taking root in the north to care for the expected increase in population during the next few years.

Through the Heart Of The Rockies

The journey by motor car over the entire length of the Banff-Windermere Highway through the heart of the Canadian Rockies can be made comfortably in one day. The route lies through virgin wilderness, and rest camps, automobile camping grounds, bungalow camps, and service stations are located along the way in such numbers as to guarantee accommodation for those who wish to make a more leisurely survey of the road.

Production of lead, tin and zinc products in Canada has increased from \$2,181,000 in 1923, to \$5,119,000 in 1927.

Memory Of
Explorer Honored

Hudson's Bay Company Remembers Captain From Whom It Takes Its Name

The Hudson's Bay Company of the year 1928, has done honor in a very beautiful way to the brave sea captain from whom it takes its name. One day in the spring of 1607 master Henry Hudson and his crew met at the little church of Saint Eloi, London, in Bishopsgate Street, London, England, to take communion before sailing away to seek the Northwest Passage.

The little church was old then, but it still stands. The company has given it three windows, and in the presence of some of its leading members, the first was unveiled a sort time ago on the anniversary of that communion.

In his little sailing vessel, with a crew of eleven men and a boy, the adventurous captain made two voyages to the Arctic ocean. On the third, in 1609, he sailed for the Dutch East India company. Taking a more southern course he discovered the Hudson river, and the Dutch traders who followed founded New Amsterdam by building a fort at the mouth of the river. In the three centuries that have passed the great city of New York has grown up around that pile.

In 1610 Hudson was again in the service of an English company. This time he took a crew of twenty-three men, and set out again to find the Northwest Passage. He discovered Hudson Bay, and spent the winter on its shores. In the spring of 1611 the crew mutinied as he was on his way to England. The captain, with seven sick men and his son, were set adrift. Nothing was ever heard of the frail craft, or its crew, but, ever since, the name of Captain Hudson has rung through Canada and the motherland, as well as the United States. The great company that still bears that name is one of the oldest and most honorable institutions of our country.

Homestead Entries
Show Marked Increase

Great Activity Seen Around Land Offices In Alberta

Homestead entries at the various land offices in Alberta are showing a very marked increase as a result of new regulations announced from Ottawa. Under the new arrangement persons who had proved up on their homesteads prior to January 1, 1926, are entitled to file on a second homestead. It is necessary, however, to make application to the Commissioner of Dominion Lands, Ottawa, specifying the land previously homesteaded and to secure authority from this source to enter for a second claim.

The Land Offices at Grand Prairie and Peace River are showing the greatest activity. At the former point 260 entries are reported during the month of June, making a total of 732 for the three months' period ending June 30, and at Peace River 400 entries in June have made up a total of 1,040 in the three months. North-bound trains from Edmonton are still carrying their full quota of prospective settlers, the majority of whom are either filing on homesteads or purchasing farm lands in the north.

Willing To Oblige

Recently arrested and brought to court was an Irishman, to whom the thing was a new experience. He was, however, unabashed, and wore an air of a man determined not to get the worst of it. "Prisoner at the bar," sang out the clerk, "do you wish to challenge any of the jury?"

Pat looked the men in the jury box over very carefully.

"Well, I'll tell ye," he finally said, "o'm not exactly 'n' trainin', but of think of could step a round or two wid that fat boy in th' corner."

A wise man knows that his wife knows that he doesn't know so much.

"Why is smoking forbidden here?"
"On account of the powder factory."
"But that has been blown up."
"Yes, everything except that no-
tice,"—Meggerdorph Blaetter, Munich.

TWO SEAPLANES CARRY MATERIAL TO H. B. TERMINAL

Ottawa, Ont.—Remarkable feats have been performed and more are being attempted this year for the Hudson Bay terminal project.

Two seaplanes, under the guidance of Flight Officer James, of the Royal Canadian Air Force, are making two flights daily between Nelson and Churchill, transporting men and material from Nelson to the New Hudson Bay railway terminal.

Each plane is doing 600 miles a day. In addition to the large amount of material transferred by the seaplanes within the past month or six weeks, 116 men who have been working at Nelson have been transported to Churchill without any mishap.

The fliers have also taken photographs for use by the topographical survey branch of the Department of the Interior, and observed ice condition off the two harbors. At present 225 men are at work at Churchill and 260 remain at Nelson dismantling the equipment there and preparing it for transfer to Churchill. Eventually practically all of these men will have been moved to Churchill.

A large amount of transfer work is being done by boats, the material from Nelson being taken to the two temporary docks constructed at Churchill. About 13,000 tons of such material and supplies will be moved during the present summer.

Another big project is the towing to Churchill this summer of the two dredges from Montreal.

Barring accidents it is expected the two dredges will reach Churchill by September 20, too late to do much work this year. Their real performance will commence next summer. The dredges and their convoys will represent a value of over \$1,500,000. The two dredges cost \$400,000 each, in addition to which will be a large quantity of material on at least one of the convoys.

Three hundred thousand feet of crib lumber is now being loaded at New Westminster, B.C., ready to leave next Sunday to journey southward down the Pacific coast, through the Panama Canal and thence to Hudson Bay. She is expected to reach Churchill about September 10. Two other vessels with supplies are due to leave Halifax at an early date.

Tunney Retains Championship

Heaney Succumbs To Technical Knockout In Eleventh Round

Yankee Stadium, New York.—Blinded and staggering, his face a bloody smear, Tom Heaney, the hard rock from Down Under, collapsed and fell a victim to a technical knockout in the eleventh round of his world's heavyweight championship battle with Gene Tunney.

Tunney, born and bred in New York, and defending his title at home for the first time, cut the sturdy, courageous New Zealander to pieces, subjecting him to one of the worst beatings a challenger ever received.

The spectators saw Heaney wade into unbroken slaughter through round after round, as Tunney, the master boxer, lashed his face with left hooks and pounded his heart with vicious solid rights.

Heaney came charging in like a bull, but the elusive Tunney, cool and collected, evaded his wild rights and the jaw and stabbed him with lefts to the face until the third of the gloves against Heaney's cut and bruised face almost became monotonous.

Nobile Reaches Norway

Harbor Workers Refuse To Handle Ropes Thrown From Ship To Dock

London.—With its flag at half mast, the supply ship Citta di Milano with General Umberto Nobile and the survivors of the Italia disaster on board, arrived at Narvik, Norway, said a Central News dispatch from that city.

The arrival, added the dispatch, was watched with sullen interest by the harbor workers who refused to handle the ropes thrown from the ship to the docks.

The attitude of the Norwegians toward the Nobile party was caused by the reports of the desertion of Prof. Malmgren, Norwegian scientist with the expedition, who was injured and left behind.

Canada's hens produce over 250 million dozen eggs a year, worth \$80,000,000.

W. N. U. 1744

Phone Call From London

Moose Jaw Station Converses With British Metropolis In Test Talk

Moose Jaw.—"Hello, this is London, England, speaking, how do you hear me?"

This question was asked by a voice speaking 6,000 miles away while the listener was a Moose Jaw man, J. A. Inch, wire chief of the local telephone office. For two or three minutes Mr. Inch conversed with the man speaking from the metropolis of England, some 6,000 miles away, and he could hear him clearly throughout the conversation.

The test call was put in from the British Isles to Saskatchewan to determine the efficiency of the long-distance system recently inaugurated whereby a person in the West can converse with anyone in the Old Country.

Veteran Mountie Dead

Captain Denny Enlisted When Force Was Being Organized

Edmonton.—One of the two last survivors of the original troops of the Royal Northwest Mounted Police to cross the plains in 1874, Capt. Sir Cecil Edward Denny, 79 years old, sixth Baronet of Tralee Castle, County Kerry, Ireland, died in a local hospital on July 24.

He left Ireland at the age of 24 and enlisted at Ottawa in the R.N.W.M.P., which was just being organized. He rose to the rank of Inspector in the force and was one of the officers to sign the famous treaty of 1877 with the Indians.

In late years Sir Cecil Denny has been acting as archivist for the Alberta Government, and has written several books on early life in the west.

Nova Scotia Reports

Few Men Available

Cannot Supply Number Asked For To Assist In Western Harvest

Halifax.—The department of natural resources has notified the minister of labor, at Ottawa, that Nova Scotia would be unlikely to supply more than 75 per cent. of the number asked for to assist in the harvest of the Western wheat crop.

It was stated that owing to the increased activity in the province in mining and other industries, the number of men who will go on the harvest excursion from Nova Scotia would not be more than 1,200.

Find Wreckage Of Plane

Idea Is Advanced That It May Explain Fate Of Nungesser-Coll

Copenhagen.—A fragment of aeroplane wreckage with some silver and bronze colored fabric attached to it has been picked up off the Jutland Coast.

In the belief that the wreckage may possibly be part of the Nungesser-Coll plane lost last year, the fragment has been sent to Paris for identification. The wreckage was found by Dr. Frode, a Danish physician. There was a wireless receiver among the fragments.

Heads Teachers' Federation

Winnipeg Man Is Elected President For Coming Year

Winnipeg.—C. W. Laidlaw, B.A., principal of the Macbray junior high school, Winnipeg, was elected president of the Canadian Teachers' Federation at the ninth annual conference here.

The other officers of the association for the coming year are C. Braden Jelly, of Summerside, P.E.I., who was given the majority vote over C. H. Sweet, of Alberta, for vice-president, and Alderman M. J. Colwell, of Regina, who was re-elected secretary-treasurer of the organization.

Will Investigate Nobile Charge

Rome.—Italy's inquiry into the conduct of the Nobile expedition, which has been ordered by Premier Mussolini to still hostile criticism throughout Northern Europe, is expected to be opened late in September or early in October. It is believed that it will be directed by Mussolini himself.

Hail Ruins Crops

Saskatoon.—A heavy grain crop, almost ready for the harvest, was completely wiped out in some parts of central Saskatchewan last week by hail which accompanied the worst electrical storm to have swept this district in a decade.

Plan Visit To States

New York.—Field-Marshal Lord Allenby and Lady Allenby have planned a visit to this country, and are due to land here October 2.

Balfour At Eighty

Distinguished British Statesman Has Been Adviser To Three Sovereigns

London.—Great Britain celebrated recently the 80th birthday of one of her most distinguished statesmen, the Earl of Balfour. Lord Balfour's public service goes back back 54 years, for he entered the House of Commons in 1874, and he is one of the few great survivors of the Victorian era. He was adviser to three successive sovereigns.

The only other statesman of outstanding eminence in the period alive today is the Earl of Rosebery. He has been out of politics for 20 years and is an invalid. Earl Balfour is a member of the cabinet today, being Lord President of the Council.

Notwithstanding the throat infection which laid him aside during the winter and spring, he is again normally active. His recent illness necessitated a rest from his usual physical activities including tennis, of which he was a devoted player, but the Daily Mail quoted him recently as saying that he intends to take up tennis again shortly.

Lindbergh's Earnings Large

Federal Tax Payments This Year Amount To \$30,000

Washington, D.C.—During the latter part of 1927, according to reliable calculations, the earnings of Col. Charles A. Lindbergh, New York, Paris flier, amounted to \$204,000 and his federal tax payments this year amount to \$30,000. He started his earnings by winning the \$25,000 Orte prize for being the first to fly the Atlantic to Paris. For touring 70 American cities he received \$300 a day from the Guggenheim Foundation.

WILL CONSIDER 'MORE PLANS TO AID IMMIGRATION'

Ottawa, Ont.—The announcement by Right Hon. Winston Churchill that the British government is prepared to spend more money in stimulating British immigration to Canada has created deep interest at Ottawa. While officials of the immigration department are unaware of the various policies suggested, it is expected that Lord Lovat, who will arrive in Canada shortly, will have complete details.

All of the proposed policies with the exception of the boy immigration scheme are either new or are schemes which have been suggested by the Canadian government and refused by the British Government.

This is true, particularly of the proposal to give to settlers a substantial loan to aid them in commencing farming. The Canadian government obtained the consent of the British Government, in the 3,000 family scheme, to an agreement whereby the British Treasury advanced \$1,500 per head but when the agreement expired the British government sought to reduce the amount for future settlement to \$800. When this was refused they increased the amount to \$1,200 and it is not expected that they will be prepared to deal with settlers in still more generous terms.

In the matter of reducing the ocean rate the Canadian government has hitherto been opposed to spending more public funds for this purpose, but it is believed that the steamship companies and the British government may unite to this end. The other schemes suggested by Mr. Churchill are all regarded sympathetically at Ottawa, and as soon as Lord Lovat arrives the department will reach a decision.

NEW CANADIAN STEAMSHIP

The "Lady Nelson," first of five steamers being constructed for the Canadian National Steamships to be operated between Canadian Atlantic ports, the West Indies, British Guiana, Bermuda, the Bahamas and Jamaica. They will engage in passenger, cargo and mail traffic, with special refrigerator equipment. The passenger accommodation will be of the most complete character. In construction these ships are being built to comply with all requirements and will possess the most complete facilities for comfort and safety. The "Lady Nelson" was launched on July 17th, and was christened by Madam Lapointe, wife of the Minister of Justice.

TO VISIT CANADA

Right Hon. Thomas Shaw, M.P., minister of Labor in Ramsay MacDonald's cabinet, who will tour Canada with the British Parliamentary Association.

Alberta To Consider Town-Planning Scheme

Premier In Position To Make Recommendation To Council

Edmonton.—Premier Brownlee has returned from his visit to the University of California, where he gave the opening address at the fourth annual convention of the American Institute of Co-operation, by invitation of the U.S. federal minister of Agriculture.

En route, he stayed at Victoria and Vancouver to interview two possible town planning directors for Alberta's recently-formed Town Planning Commission.—H. L. Seymour, town planning commissioner for Vancouver, and Doughty Davies, who has just completed a town planning survey in Victoria. These two, with other applicants will be considered by council in the near future, and the premier indicated that he was in a position to make a recommendation to council.

May Meet In Canada

League Of Nations To Consider World Disarmament Conference

Ottawa.—A world disarmament conference, vastly more far reaching in its scope and consequence than the United States Multilateral Treaty for the outlawry of war, will be considered by the council and assembly of the League of Nations in September.

It is said that in the event of the conference being decided upon the Prime Minister of Canada may issue an invitation for the conference to be held in Canada.

Big Opium Seizure

Shipment Valued At \$120,000 Is Seized At Nanaimo

Nanaimo, B.C.—Opium valued at \$120,000 was seized in the bonded warehouse here. It was concealed in a package of freight marked "peanut oil" and "salt turpentine."

The packages were addressed to Lun How, a local Chinese merchant and are thought to have come over on a liner recently arrived from Asiatic ports.

The seizure was made by provincial police assisted by officers of the customs preventive staff.

Lessening Fire Hazard

Winnipeg.—Rain is gradually lessening the fire hazard of the forests of Northern Manitoba districts, and according to forestry officials here the 20 to 30 fires which the Royal Air Force and the fire rangers have been fighting strenuously during the past month, are gradually petering out under the drenching.

Cannot Supply Plane To Hunt Prospectors

Department Of National Defence Receives Many Appeals

Ottawa.—"The first requisite of a prospector is the ability to find himself." That is the view taken by the Department of National Defence as outlined by an official of that department. The department is being inundated with appeals for 'planes in search for prospectors thought to be lost.

"When a prospector in the Northern woods falls to turn up when his employers or associates think he should they rush to the Department of National Defence asking that a 'plane be sent to search for him," said this official. "In most cases the plane declines. In the first place, the prospector is probably not lost at all, but something has impeded his progress. Then if he were lost there is very little chance of an airman seeing him from a 'plane."

English Cadets Will Compete

Ottawa.—A party of English cadets will make a tour of Canada, will participate in the annual prize meeting of the Dominion of Canada Rifle Association here, Aug. 13 to 17. There will be fourteen in the party, under the command of Captain R. J. E. Hanson. Ten members of the Australian Easley team, who will return home by way of Canada, also are likely to take part in the matches, while most of the members of Canada's Easley team are scheduled to enter.

A team of cadets from Victoria High School, Victoria, B.C., will take part in the Dominion matches and will motor from the capital of the Western province.

At the matches last year, there was one woman competitor and this year there is a prospect of four or five women entrants from Saint John, N.B.

Start Long Water Trip

Vancouver Men Sailing From New York To San Francisco Via Panama Canal

New York.—James McArthur and Sydney A. McQuillan, both of Vancouver, B.C., sailed down the Hudson River in a 34 foot motor launch, the Miss Vancouver, bound for San Francisco. They will go by way of the Panama Canal.

McQuillan, who is a well known speed boat enthusiast of Vancouver, and who has already travelled more than 100,000 miles in that type of boat, is planning the trip as a method of proving the possibility of using a slow speed motor in a high speed hull.

ARCHBISHOP OF CANTERBURY HAS RESIGNED OFFICE

London.—After serving for 25 years as Archbishop of Canterbury, Right Rev. Randall Thomas Davidson has resigned. His long-expected retirement was undoubtedly hastened by Parliament's second rejection, last month, of the revised prayer book, in support of which he had labored for years.

It was announced officially that the King had received with great regret an intimation from the Archbishop that he was desirous of resigning his high office. His Majesty, on the recommendation of the Prime Minister, by Royal Warrant, appointed a commission consisting of the Archbishop of York, Bishops of London, Durham and Winchester, for the purpose of receiving the resignation of the primate.

The commission reported that it accepted the archbishop's resignation to take effect on November 12, of this year, and this has been approved of by His Majesty.

The Archbishop of Canterbury, 80th of his line, is 80 years of age. At about the time his resignation will take effect he and his wife will celebrate their golden wedding anniversary, and it is planned to present to them on this occasion a fund which is now being collected, to ensure greater comfort in their declining years. A memorial will also be placed at Lambeth Palace, residence of the Archbishops of Canterbury, to mark the general gratitude for Dr. Davidson's long and painstaking services to the church and the nation.

Most Rev. Cosmo Gordon Lang, Archbishop of York, is the most probable successor to Dr. Davidson, in that it is reported he has already been offered the post and has indicated his acceptance.

WOULD FORM A CENTRAL BUREAU OF EDUCATION

Winnipeg.—Agitation for the establishment of a Dominion Bureau of Education, which had its inception at a former assembly, was revived in resolution form at the Canadian Teachers' Federation convention.

The objects of the bureau would be to bring about uniformity in the standards of the teaching profession and the creation of a federal teachers' registry, centralization of educational policies and stimulation of research work under government supervision.

Another resolution upon which action was deferred, asks the national research council to set aside a certain sum of the annual grant for the study of educational psychology.

A resolution advocating that steps be taken by the departments of education in the various provinces of the Dominion to limit the number of students attending normal schools to the needs of the provinces was passed for re-draft.

A comprehensive survey of the advancement made in the field of educational research was given by Dr. W. F. Russell, dean of Teachers' College, Columbia University, N.Y. In his opinion there was a tremendous need for intensified and concerted effort in this work. Granted that normal progress noted in the past was continued in the future he predicted that the teaching profession in the next hundred years would see as significant an advance as seen in the field of medicine and other sciences.

Dr. Russell stated that too much stress could not be laid upon the importance of scientific study of educational problems. He expressed the hope that Canada and the U.S. would join with other nations of the world in interchanging results obtained from their independent investigations. By such a forward step, overlapping would be avoided to a degree, educational standards materially advanced while the pupil would derive inestimable results.

Harvesters From B.C.

Coast Province Will Be Able To Supply Usual Quota

Vancouver.—British Columbia will be able to supply its usual quota of harvesters to the prairie provinces this year. In the opinion of government officials, there is no degree of conditions in British Columbia are better than in past years, it is estimated that six thousand men will be available for the harvest fields of western Canada this year, in the opinion of J. H. McVety, superintendent here of the Dominion employment service.

Record Number Of Entries

Many Nations Will Be Represented At Olympic Events

Amsterdam.—Entries for Olympic swimming, rowing, yachting, wrestling, modern pentathlon and cycling have closed with a record number of countries signifying their intention of competing.

Thirty-four nations will be represented in the Olympic swimming, 23 in yachting, 29 in rowing, 29 in wrestling, and 14 in the modern pentathlon.

Portrait Presented To Domlaio

Ottawa.—A magnificent life-size portrait of the late Earl of Minto, at one time Governor-General of Canada, has been presented to the Dominion archives. The portrait, the work of Miss Vical, an English artist, arrived recently, and has been hung in the room devoted to Governors-General. The Dowager Countess of Minto, widow of the late administrator, donated the gift to the nation.

Situation Much The Same

Ottawa, Ont.—Renewed reports that the Government may take over a number of provincial or privately owned railways in different parts of the country and merge them with the Canadian National, brought the statement from the Minister of Railways that the situation is very much the same as in the last session, when he stated that Sir Henry Thornton is looking into all these propositions.

Camp Borden Flier Killed

Toronto.—While dropping a note from an airplane to his fiancée, Miss Dorothy Filler, at Wasaga Beach, Ralph Brown, 23 years old, of Winnipeg, Camp Borden pilot, is believed to have struck an air pocket and crashed to his death when the machine collided with a tall pine tree.

Honey Exports Increase Rapidly

Canadian Product Regarded With High Favor In Europe

Well established markets for Canadian honey appear to have been gained in Germany, Holland, Great Britain and France. Exports to Germany have more than tripled in the past four years, that country taking 648,000 pounds in last fiscal year. Holland and Great Britain also came in the neighborhood of 600,000 pounds compared with only 9,000 pounds in the previous year. Altogether exports of honey from Canada were a half million pounds greater than in the previous year, amounting in all to approximately 2,100,000 pounds.

In Europe, Canadian honey is regarded with high favor and no clearer proof of the esteem in which it is held could be asked for than the fact that exports to European countries are four times what they were just five years ago. The rapidly expanding export market should be an incentive to the keeping of more bees.

Canada's honey production last year amounted to 22,248,000 pounds, valued at \$2,783,000 according to preliminary estimates recently issued. But this is a comparatively small amount of honey compared with what the Dominion can produce, for according to Mr. C. B. Gooderham, Dominion apiarist, there are still large areas of Canada totally unexploited so far as bee-keeping is concerned and which have possibilities just as great as any district in which the industry has been developed. Particularly is this true of the Western Provinces, and it is in that area that most rapid progress is being made. Manitoba produced over seven million pounds of honey last year, falling not far short of Ontario, which is the leading province in honey production. The introduction of sweet clover into Manitoba is largely responsible for the increase in bee-keeping, and this is a factor also in Saskatchewan where the number of colonies of bees is increasing very rapidly.

Bee culture is the means of obtaining a natural pure food product of great excellence for human consumption, and which exists in great quantity in the nectar-producing flowers of Canada. Thousands of tons of honey are going to waste annually in Canada for want of bees to gather it, the only crop which can be harvested with free labor, besides which honey bees are of great value to the producer of seed and fruit because of their beneficial work in cross pollination of various economic plants and trees.

Cannot Come To Soon

But In Time Needless Driver Will Be Eliminated

Some day the reckless driver will be eliminated. Before a locomotive driver is put at the throttle of an engine drawing a passenger train he must have proved his ability to control his engine and his superiors will have satisfied themselves that he has what is known as a level head. Lives are placed in his care. Is the same not true of the driver of a car? The reason for allowing the hair-brained drivers freedom of the roads without restraint is obscure just now, but eventually a car driver will have to be qualified in more ways than mechanically.

Waterton Lakes National Park
Waterton Lakes National Park is situated in southern Alberta, and has an area of 220 square miles. The southern limit of the park is the International Boundary between Canada and the United States, and this line is the northern boundary of the United States Glacier National Park.

Douglas Fairbanks is 44 years of age.

Canada has the largest buffalo herd in the world.

"This vase is 5,000 years old. This is quite modern."
"May I handle them?"
"Yes, but don't mix them, or I can't distinguish them." Pele Mele, Paris.

W. N. U. 1744

Frozen Desserts Simple To Prepare

No More Difficult To Make Than Many Findings

A simple frozen dessert is no harder to make than many puddings and most pies, points out Florence Tait Eaton, in the August issue of "Successful Farming." "Frozen foods," she says, "should be offered more frequently for salads and desserts. They are cooling and healthful, and when we rid ourselves of the idea that they are difficult of accomplishment, their preparation will not seem a burden."

The chief thing, she declares, is to have utensils that are adequate, conveniently at hand, in a good order. "Conventional necessities, other than the freezer, are rock salt, ice, a heavy metal, stout bag, and measure. Proportions of ice and salt are three measures of finely-cracked ice and one of salt. Pack solidly, turning crank occasionally to settle ice, and pound the ice firm with the mallet handle. Turn crank slowly at first, then more rapidly. When mixture is stiff, draw off the water, take out dasher, pack cream solidly, put a cork in the cover and re-pack freezer.

"Water ices," continues Mrs. Eaton in "Successful Farming," "are easily made without recipes by freezing an extra and rather rich fruit drink or sugar, fruit juice and ice water. A good general rule is as follows: Dill one cupful of water with one and one-half cupfuls of sugar five minutes. Cool and add a cupful of pure fruit juice, another cupful of water, and a little lemon juice."

"Sherberts are made by adding the beaten whites of one egg to this foundation recipe. Simple ice creams, not too rich, but delicious, may have a flavored custard for a foundation. My recipe is as follows: To one pint of boiling hot milk in the double boiler add two eggs beaten slightly with one cupful of sugar, a pinch of salt, and two tablespoonfuls of flour. Shake the sugar and flour together before mixing with the eggs. Cook, stirring, until smooth and thickened, then cool."

Color Cautions

Choosing Colors Should Be A Matter Of Some Consideration

1. No person can wear all colors successfully.
2. The color and texture of the skin determines the color most suitable for clothing. A person with a blue-bronzed skin, for example, can wear deep greens, bronze greens, deep dark red, even purple in some tones. If the skin is not fine in texture, these colors may still be worn, but they must be subdued and softened, "grayed down" in other words, so that they do not contrast too strongly with the skin. A skin that is more pink than yellow can wear pastel colorings best of all. Such skins usually have blue, hazel, or very brown eyes. They may have blond, hazel, white or black hair. A yellow skin can wear dark browns and black perhaps better than any other color.

3. Subdued or grayed colors are most becoming to "large" features.
4. Colors should be chosen to bring out the best features of the individual either the skin, the hair, or the eyes. If the skin is fine, you may wear satin, or velvet, or a non-transparent material with a sheen. If the texture of your skin is coarse, georgette, dull crepe, or crepe Elizabeth would be more becoming.

5. Gayer colors may be worn more successfully by young girls but the intense or pure colors should be avoided since they are becoming to very few.

6. Bright colors, if carefully chosen, are quite suitable for sport clothes and evening gowns.

7. Study carefully your own coloring and choose those most suitable for your own type, age, and position.

From Successful Farming.

Business Was Evidently Poor

A commercial traveller was working in a new district, and orders were few and far between. Entering an establishment, he presented his card, only to be told that there was really nothing in his line that was wanted. "Will you permit me to show you a few of our leading articles?" begged the salesman.

"No sir," was the reply, "we really cannot spare you the time at present."

"Well, sir," persisted the salesman, dejectedly, "would you mind if I opened my bag here and took a look myself? I haven't seen 'em for nearly three weeks."

How Could They
Mrs. Smith—"This 'ere fellow thinks 'e can sing like Caruso."
Mrs. Brown—"Well, they do say 'ow Caruso' ad a beautiful voice, but 'ow could they know, with 'im stranded on that island with nobody to hear him but Friday?"

Sheep Breeding Experiments

Rambouillet Grades Give Highest Quality Of Wool

The Scott, Saskatchewan, Experimental Station is carrying on a very useful work in grading up sheep flocks by the use of Shropshire, Cheviot, and Rambouillet sires. Three flocks of grade ewes, numbering twenty-five, constituted the breeding stock, each headed by a ram of one of the breeds named. Each flock is annually reduced to twenty-five ewes, and about thirty lambs are held for feeding experiments, and from these the young breeding stock is selected. The work has not gone on sufficiently to enable a definite comparison to be made between the different breeds for grading up. The wool clip, however, can be compared which in 1927 amounted to an average of 8.1 pounds from the Shropshire grades; 7.4 pounds from the Cheviot grades; and 8.9 pounds from the Rambouillet grades. The wool was marketed through the Co-operative Wool Growers' Association. Each fleece was tagged at the time of shearing, and after the wool had been graded, the tags were returned to the station. A table representing the wool grading published in the report of the station for 1927, and available at the Publications Branch of the Department of Agriculture, at Ottawa, shows that the Rambouillet grades gave the highest quality of wool, the Cheviot grades the lowest, and the Shropshires' occupying a midway position.

To Make Tests At Olympics

Dr. C. H. Best, well known Toronto doctor who collaborated with Dr. Banting in the discovery of insulin, has been sent by the Commonwealth Laboratories to the Olympic games to study the effect of exhaustion of athletes. Dr. Best has in connection with his work at the Commonwealth Laboratories, already made considerable study in this line at Toronto University.

The first coated tasteless pill was made by a Brighton, England, chemist in 1850.

Raspberries In Saskatchewan

Highly Satisfactory Yields Reported At Indian Head.

Given suitable winter protection raspberry plants come through the winters in Saskatchewan in very good condition. At the Indian Head Experimental Farm the raspberries are bent over each autumn and covered with a few inches of soil. With a deep covering of snow such a procedure may not be necessary, but the uncertainty of the snow blanket makes it doubly safe to use the earthen covering. In his report of the Farm for 1927, published by the Department of Agriculture, at Ottawa, the Superintendent, Mr. W. H. Gibson, points out that covering the canes with soil has the advantage of protecting them from injury by rabbits, and the ill effects from freezing and thawing in the spring. Last year the superintendent reports a highly satisfactory yield of berries was harvested from the canes of the different varieties that reached average heights of from fifty-two to sixty-six inches. Six or eight strong canes were left in each hill to bear fruit this year, when the expected full crop will be reported for those interested in the findings of the Farm.

A High Official

Fire Ranger Occupies Station 5,000 Feet Above Sea Level

The highest official in British Columbia, in point of altitude, is the fire ranger occupying a look-out station on Mount Cartier, in the Revelstoke district, 9,000 feet above sea level. Even in summer weather he obtains his water supply from snow. Telephone communication with district headquarters enables him to turn in an alarm which can bring an army of fire fighters to the scene in short order.

From his exalted station this ranger guards an area containing 130 billion feet of British Columbia timber.

A blunt remark invites a sharp answer.

The Imperial University of Tokio is the largest in the world.

NEW TYPE FRUIT CAR

For the transport of fruit from the Fraser and Okanagan districts in British Columbia, the Canadian National Express has developed and placed in service a new type of air-cooled fruit car. While this method does not develop as low a temperature as ice, the process is more natural and fruit does not deteriorate as quickly when removed to the warmer outside temperature.

The cars are ordinary baggage or express merchandise cars, 60 feet long, which have been equipped with special ventilating devices, consisting in part of ten metal air intakes and channels fixed in a staggered position, five on each side of the car, to carry outside air while the train is in motion, through the channel into a chamber under a raised false flooring. There are also eight metal air exhausts, staggered four on each side, which carry off the gases and foul or warm air thrown off by the fruit and vegetables. The intakes and exhausts lead to the outside of the car. The intakes are so arranged that they bring cool air into the car irrespective of the direction in which the car is moving.

Tests of an empty car showed that the car exhausted 292,500 cubic feet of air per hour, which is equivalent to changing all the air in the car every 68 seconds. A car loaded with 800 crates of radishes with the tops on, asparagus and spinach, exhausted 168,300 cubic feet of air per hour, or a complete change of air in the car every 101 seconds. Thermographs in this car showed the inside temperature to range from 53.54 and 56 degrees, while the outside temperature ranged from 78.58 and 56 degrees. Another test carried out with 1,200 crates of the same traffic showed a complete change of air every 87 seconds, and temperature readings inside the car of 60, 63 and 60 degrees and outside readings of 80, 84 and 63 degrees.

Another feature is that since the intake devices come in under the false floor, any dust or cinders that may enter the channels remain on the bottom and are not blown on the fruit, which arrives as clean and as fresh as when it left its shipping point. The photograph shows an interior and exterior view of the new car.

WHEAT SHORTAGE IN RUSSIA

Soviet Economic Policy Is Leading To Dangerous Consequences

Recent rumors of an impending grain shortage in Soviet Russia are confirmed by heavy purchases of Canadian wheat. It is a case where money talks. The hard-headed Bolsheviks are not buying Canadian grain for the fun of it. They are doing so because the domestic situation makes it necessary. The explanation for the shortage is simple, but its possible consequences are complex and even dangerous—to somebody.

The peasants of Russia are refusing to produce a surplus over and above their own needs because it is useless for them to do so. They cannot buy clothing or manufactured goods in return for such a surplus except at discouragingly exorbitant prices. Why should they toil and sweat for no purpose? This is the weak question that breaks the eloquent arguments of the theorists, and causes the handbooks of the local Communist Commissioners.

For months, even years, the rulers of the Russian Communist Party have foreseen some such a crisis. They faced it once before in the early days of the Revolutionary Government. At that time Lenin, who was a realist in action, averted a fight to a finish by introducing his New Economic Policy. This policy was as hypocritical as it was politic. It was not new in anything but name. It was nothing but a partial restoration of the old right to free barter, purchase and sale.

The Soviet hierarchy have always realized that Lenin's policy was a makeshift. They were on the horns of a dilemma. If they allowed the New Economic Policy to continue, the complete restoration of the capitalist system was only a matter of time. If they abolished it or restricted it, difficulties with the peasants were inevitable.

Trotsky and his fiery little group of fanatics always insisted on the latter course. They urged that treaty with the peasants was the lesser of the two evils, and that critical conditions at home might be offset by military expeditions abroad. The strange thing is that, while Trotsky's group was completely defeated by Stalin, in the party fight, the radicals were no sooner expelled than the victors themselves swung sharply toward the left.

During the past few months the private traders have been harassed anew. Prices have risen sharply. The stage is set for some kind of a new scene. The world cannot afford but to watch intently. — Toronto Globe.

HAVE AIDED DEVELOPMENT

Some Of World's Wealthiest Mines Found By Animals

One of the richest copper strikes on Vancouver Island was made by a dog, according to Harry Tanner, well-known mining man who has just returned to Victoria from a prospecting trip.

Tanner's dog was a companion on one of his trips and sought to rival his master in the discovery of "lead." One day on the west coast of Vancouver Island Tanner heard his dog barking persistently and went to see what it was all about. To his astonishment he found the dog scratching around a rich outcrop of copper ore which development proved to be one of the richest strikes on the island.

The story of the donkey which discovered the famous Bunker Hill and Sullivan mine in the Coeur d'Alene, Idaho district has often been told. That donkey was pensioned for life as its reward. Several mineral discoveries have been made as the result of float found on the dumps and holes dug by bears in their search for groundnuts. The despised pack-rat has proved to be one of the best prospectors, and many a miner has told how his stake was due to a pack-rat stealing his supplies and replacing the stolen goods by pieces of quartz.

The Cariboo story is told of a rich placer strike having been made as the result of a pack-rat trading items in the prospector's outfit for gold nuggets, as if that rodent was more than honest in making compensation for his crime.

The people of Doorn, by public subscription, can we have something a la carte?
"Sure, why?"
"I wanna see the waiter wheel it in."

Film Actor: "But look here, if he's going to throw me into the rapids now I'm 'goin' to get out!"
Producer: "Oh, that's all right, you don't appear again!"

Japanese Learning English

Desire To Learn Language Almost Universal But Means Are Inadequate

The attendance of 3,000 persons, virtually all of them Japanese, at a dramatic tournament in Tokio, conducted in the English tongue, brings out graphically the tremendous hold which that language has acquired in eastern Asia. It may well be wondered whether 3,000 persons would attend a similar tournament in New York or some other city of the United States if it were conducted in, say, the French language.

The discussion of manufacturing a world language becomes academic in view of the world conquest which the English language is actually making today, and perhaps in no other country is that so widespread and successful as in Japan. The study of English is compulsory there from the sixth grade upward. English, signs abound throughout the Empire, and there is scarcely a Japanese who does not speak at least a few words of this tongue.

This intensive drive to acquire English on the part of the Japanese nation is not due to propaganda or to artificial stimulus of any sort. It is predicted on the very solid and substantial ground that for a young Japanese to have a working knowledge of English is a most tangible asset to him in almost any line of work upon which he embarks. Relations among the individuals of nations are coming to be more and more a business nature, and English is the unquestioned business language of the world. Other tongues borrow words and phrases from English for this purpose, just as English feels free to draw upon Greek and Latin for certain terms and has drawn upon French in the past for diplomatic verbiage. As regards Japan, the fact that the bulk of that nation's foreign trade is with the English-speaking peoples is an added incentive to the young Japanese looking forward to and preparing himself for a successful career.

The progress that the English language has made in Japan is remarkable, but it would be erroneous to call Japan a bilingual nation. Like the American, the Japanese has earned the reputation of being a poor linguist. The desire for English is almost universal in Japan, but the means of achieving the language are still inadequate. Many of the teachers are themselves Japanese who have never learned properly to speak English, although they may have an excellent knowledge of the language. Textbooks need revision, and other steps must be taken for which at present funds are not available.

The progress that the English language has made in Japan is remarkable, but it would be erroneous to call Japan a bilingual nation. Transplanting Iris

August Proves a Good Month For Transplanting

August proved a good month for transplanting iris plants at the Indian Head Experimental Farm. At that season of the year fresh roots are developing and according to the superintendent, in his report of the farm for 1927, published by the Department of Agriculture, at Ottawa, the work might have been done even a little earlier with no disadvantage. Finely divided hydrated lime was incorporated with the soil at the time of transplanting. The following year very fine blooms were produced by the 20th of June and the 19th of July. Of the thirty varieties grown at the Indian Head Farm, Wyomissing, Othello, Gasus, Albert Victor, Eldorado, Parc du Neully, Honourable, Rose Unique, Loreley, Mrs. H. Darwin, Salvatore, and Celeste, deserved special mention.

People have widely different notions as to what constitutes a good time.

An Englishman can leave his property away from his family; a Scotsman cannot.

"How did the fight begin?"
"One is a pacifist and the other an anti-militarist. One said the other thought less of peace than he did, and so he started to settle it." — Kasper, Stockholm.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XXIX.—Continued.

The heavy rain had washed the roots of the old dead grass into the ground, leaving the old young shoots showing, and the air had such a balmy mildness that Helmi was content just to sit and breathe it and watch the clouds, clear and white, like bonny wool, sailing overhead in the limitless blue.

She wanted to sing a song of the passing winter, with all its strength of frost and weight of snow, its frozen rivers and leafless trees, for every budding tree and springing flower and carolling bird was singing it, too. She remembered a song Mrs. St. John used to sing, which she said was an old-fashioned thing, but she sang it to please the doctor, who liked the old songs best:

"Blue bird, true bird, bird with the golden wing,
Do you bring me a letter or do you bring me a ring?"

Helmi brought out a chair, and sitting on it, nursing her knees, she sang in perfect happiness. She sang four dollars in her pocket; a sick baby in the Isolation Hospital; a dog with "three pups" to whom she had promised food and shelter; a husband who apparently had deserted her; not a relative nearer than Finland; but she sang a song of hope, and love, and spring, looking into the blue sky above her, for in her heart there was the peace which passeth all understanding!

Mrs. McMann, on her way to the store, saw Helmi sitting at the end of the house and heard her singing, and forthwith forgot that she had left an oven full of pies.

"Helmy," she called, as she came

never, out of breath in her hurry. "What is wrong with you? Have you come back?"

Helmi quickly rose up to greet her. "There's nothing wrong, Mrs. McMann. I am all right—I'm fine—I'm happy that's all."

"But Helmi, where is your child?" Mrs. McMann was prepared to show a strong if somewhat belated interest in Helmi's baby.

"She is all right too," Helmi said. "She is in the Isolation Hospital with scarlet fever, but is doing well and will be out in a few weeks."

Mrs. McMann heard the news with doubtful forebodings.

"Oh, Helmy, don't set your heart on her if she has scarlet fever. It always leaves something behind it—deafness, or blindness, or something."

Helmi resisted an impulse to laugh. "Oh, I don't think so," she said, "she will be all right. I feel sure she will be well. I am not worried."

Helmi's cheerfulness seemed most untimely; nor could she explain it to Mrs. McMann—there was a greater bar between them now than even that of language.

"Well, it's grand to take things as easy as you do, Helmy. I must say. Now when my children were little they had the fever, too, all together; not very bad, but I worried. Mr. McMann—no it was Mr. Bush I had then—scolded me for crying all the time, but I couldn't help it. Why, I cried! He could not understand a mother's heart, of course. But no doubt girls are different now—I was so conscientious, I suppose in a way you are glad to get away from the baby for awhile? Well, it was different with me—I loved for mine. But it doesn't pay. Are you going to stay? No! Can't back are you? City life is too much for girls these days. Picture shows attract them. Well, in the midst of life we are in death, remember that, Helmy, and don't put your trust in worldly pleasures. Did you hear what happened to the magistrate at Bannerman last night?"

In her happiness Helmi had not been thinking of the magistrate. Startled by Mrs. McMann's enquiry she could only say "Do you mean Col. Blackwood?"

"Yes, the same one—the one that forgot to put it down in his book. He won't forget no more—he was struck with lightning."

"How do you know?"

"He was found lying on his back, stone dead, and his chin was all Col. Blackwood!"

Helmi shuddered—she knew just how the eyes looked.

"I gave me such a turn when I heard it, and I ain't been so well again. My stomach's up on me again. Helmy, I believe I'll have to go home and see a doctor. I can't trust any of the doctors here—they haven't got the papers like they hold in the States. All my trouble is inward, Helmy, and I don't believe these doctors could ever understand it."

"I am sorry," said Helmi. "I wish I could help you."

In her new found happiness Helmi could understand Mrs. McMann's all but pitiful little striving for praise and applause. Her sordid life, her little meanness, her petty jealousies, her dull gray outlook, smote Helmi's heart now with pity.

"You're a good girl, Helmy, no matter what you've done or haven't done, and I've a good mind to take you home and make you what you want."

Helmi laughed as she patted her visitor's arm. "Where is good old Sim?" she asked quickly. "Is he still here? He did not write to me."

"Oh, didn't you hear? He had an accident in the mine and hurt his leg. He is still in the hospital, so I guess that's why. They say he'll never be able to night-watch again. You know I miss him, too, and wish very that I hadn't been quite so sharp on him. Well, won't you stay, Helmy?"

"No, I am going to the City," said Helmi, "but I want you to feed Cleo and the pups for me. There's plenty of scraps from your table, and they can sleep in my house. I'll ask Bill

Larsen to shut the door at night, and open it in the morning, and when Lili is better I will come back. You will like my Lili, Mrs. McMann; she can smile now and play with her hands."

Mrs. McMann sighed. "I am always sorry when I see a girl like you—life is so hard for us women."

Helmi got another letter at the post-office, a letter from Arthur Warner enclosing another fifteen dollar cheque. He was over in France now; on active service, and the letter was written as he sat waiting for the signal to go over the top in an attempt to capture a German position.

"It's good to have someone to write to Helmi, someone who cares; and I want you to do something for me. It worries me to think of my house and garden lying idle there and going to ruin. I wonder if you would go there to live. The garden has raspberries and currants and strawberry plants too, and there are provisions in the house for a year. If you go there I want you to take Cleo, too, and give her a home. She is wonderful dog. I cannot tell you what she has been to me. And my horse, Sallor, that I left with the Bannermans would be handy for you to drive to town. I would feel better if I knew you were there, dear Helmi, and I hope you will go. It does not seem reasonable to believe that I shall ever come back; but if I do, the place will be in better shape for your having occupied it. So you will be doing me a good turn. Write soon and often, Helmi, please."

At the bottom of the letter there was a postscript. "You will never need to be bothered with these meddlesome prospectors hunting for coal, for I bought all the mineral rights; so if the bank of the creek is solid with coal, and I rather think it is, they can never come in without your consent. If you want to plant the garden this spring you will find the seeds in the root-house, all labelled. Maybe I had the wrong saint on life, Helmi, wanting to build a wall around myself. I've had time to think it over, and I can see it. They can never come live that way. Now I want you to do what you like with everything that is there. I have made my will and left it to you. My lawyer here will arrange matters fully if anything happens. I enclose his address. Now we are going—A. W."

Helmi was in her own little house when she read the letter. Cleo whining at her feet as if she knew her master had written. "He is well, Cleo, and he wants you and me to live together, and so we will. We had decided that already, and now I see God has sent me a home as well as a dog to keep me company. I do not know how we will make a living there, eight miles from any settlement, but we should worry over a little thing like that. God will provide for us some way, Cleo."

(To Be Continued.)

Reliable Weather Sign

Red Sky In Morning Sure Indication Of A Storm

An old English rhyme says: "Red at night is the shepherd's delight."

Red in the morning is the shepherd's warning.

The idea it expresses is known in nearly every country in the world. Even the ancient Egyptians and Greeks had sayings similar to the above. Furthermore, it is scientifically true. Red skies are really weather forecasts. If the atmosphere is clear in the evening or morning sunlight is red because the blue of which the ordinary white light of the sun is made up has been absorbed by the great length of atmosphere through which the slanting rays of the sun have to pass. In the evening the light of the sunset illumines the clouds on the eastern side of the sky. This shows that the clouds have gone by and are taking the rain with them. Thus we get red at night, indicating fine weather. In the morning, the rising sun being in the east, the light illumines the western horizon and its clouds, which are on their way to us. We need not be sheep-herds to know that if the sky is red at dawn, however in the morning we are in for a good "soaker" before lunch-time comes.

A Slight Omission

A farmer was accused of having slandered his neighbor.

"Did you call him a rogue and a liar?" asked the judge.

"Yes, I did."

"And did you call him a thief?"

"No, I forgot that!"

Among the strange specimens discovered in Brazil are flat fish with a poison spike in their tails, and vultures which make noises like barking dogs.

In Georgia every unmarried man or woman of 30 has to pay a tax of six dollars yearly.

A treat in the Peppermint-flavored sugar-coated jacket and another in the Peppermint-flavored gum inside— utmost value in long-lasting delight

Voices Have Individuality

No Two Have Same Tone, Say Blind People

In the blind, the faculty of hearing is usually intensified and one thus handicapped in speaking of voices says, "Many are similar, to be sure, but I have never encountered absolute doubles, and in general voices are as sharply differentiated as faces—in fact, often far more. The only difficulty I have experienced, strangely enough, is caused by one person having several voices. All of us have; we change tone and quality more or less unconsciously according to our mood and condition. But in some the change is disconcertingly marked. One woman, for example, has as many as five voices, each quite distinct. The physical condition is also revealed by the voice in a striking degree, both as to change and normal characteristics. Fat people, for example, have a voice quality which is all but invariably detectable. Character, too, is easily read. In fact it seems that character is revealed in the voice even more fully and accurately than in the face, no doubt because the seeing, failing to recognize this, makes less of an attempt to mask the voice."

Parliamentary Courtesy

Language in the Free State Parliament Is Sometimes Lurid

The new flames of faction of battling the Speaker which culminated in the suspension of Mr. de Valera's chief whip, Mr. Aiken, are not likely to increase the prestige of the party. In a letter to the press, Mr. Aiken, in justification of his attack on the Chief, insists that only an assembly poisoned by English influences could object to have its Speaker described as a "damned hypocrite," a "party hack," and "a mean stunk." Unfortunately for himself and his colleagues the country is still so enslaved to an alien tradition that it regards as vulgar abuse expressions that, in the Gaelic State of Mr. Aiken's vision would apparently be the flower of parliamentary courtesy.—Dublin Correspondent, the New Statesman.

The Thoughtful Sportsman

Grouse season had started, and in the little Highland hotel lounge some sportsmen sat smoking.

"I've said one suddenly, 'everything I shoot I send to the hospital.'"

"How thoughtful and kind of you," broke in another.

"Yesterday," he continued, "I shot the gamekeeper."

BABY GIRL HAD DIARRHŒA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhoea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhoea and was running around as well as ever."

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

JUMPING TOOTHACHE

You have been fortunate indeed if you have never experienced that worst of all dental pains—the "jumping toothache."

But perhaps you have listened sympathetically to your little chap as he tried to tell you between sobs, how something just seemed to be jumping up and down inside the tooth that pained more and more intensely as he lay with his cheek against the pillow.

Almost instinctively, perhaps, you had him sit up, and he found happily, that it did not hurt nearly so much as when he was lying down.

Now, you thought perhaps it was because he stopped thinking about it so much, or sitting up, that made the pain more bearable, but just why it "jumped" you were not so sure.

Well, no doubt you have had a cut finger with an area of inflammation around the wound, and you noticed that the pain was of a throbbing character, the with each pulse beat there was a sharp little stab, so to speak.

Now, the same with the tooth, with each heart-beat, a new supply of blood is forced into the pulp tissue, which, being inflamed and already engorged with congestion, is subjected to an increased and severe pressure (at each beat), and a consequent response on the part of the nerves as they are subjected to the abnormal pressure. This, we call pain.

Then with your little chap sitting up, the flow of blood to the head was lessened, resulting in a milder rush of blood into the tooth pulp which caused a decreased pressure, with lessened pain.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that their little ones are reasonably safe during the hot weather. Stomach troubles, cholera, infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly.

Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail, in a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Wool Prices Pay

Prices Being Paid Are Considerably Higher Than Last Year

Wool prices in Western Canada this season are running from 24 to 28 cents a pound, compared with 17 to 20 cents last year. In the range country of Southern Alberta, from 24 to 26 cents is being offered, with 21 to 25 cents in Ontario, and from 24 to 28 cents per pound in Quebec. The first settlements for Ontario early spring and winter shorn wool, which are now being made by the Canadian Co-operative Wool Growers, reflect these higher values, being as much as 40 per cent. above the settlement prices of a year ago. A keen demand is reported for medium qualities, in which class the greater part of the Canadian production falls.

Paring a corn is both risky and ineffective. It is much better to use Heilmann's Corn Remover and eradicate them entirely.

Plane Suitable For Trans-Ocean Service

German Machine Has Many Features To Support This Belief

The first plane which German experts believe suitable for trans-ocean service has been completed by the Rohrbach Metal Aeroplane Works.

The reason that engineers believe their "flying yacht" is adapted to trans-ocean flights is because it has a cruising radius of two thousand five hundred miles without instant extra fuel tanks, a boat's force which is seaworthy should landings on the ocean become necessary, and a carrying capacity for twelve passengers, besides a crew of five and several tons of post and freight.

In addition the designers calculate that three motors will give the plane a speed of one hundred and fifty miles an hour, making a Hamburg-to-New York trip possible in the space of twenty-four hours, including two stops for refuelling. After tests, however, the first trip will be made to Buenos Aires, for it is the won of Latin America to open trans-ocean air traffic over the Germany-to-Argentina route first on account of the shorter distance across the open water, and more favorable weather around the Equator.

Minard's Liniment — The Universal Remedy.

THE Firestone Gum-Dipping process strengthens the tire to meet the demands of hill climbing, quick stops, sudden turns and high speeds. The Firestone tread is scientifically designed to grip the road in emergencies. You can have this extra safety on YOUR car. Ask your local Firestone Dealer. He will save you money and serve you better.

Always put a Firestone steam-rolled, leak-proof tube in your Firestone tire.

FIRESTONE TIRE & RUBBER CO. OF CANADA LIMITED Hamilton, Ontario

Firestone Builds the Only GUM-DIPPED TIRES

Little Helps For This Week

"Fear not, believe only."—Luke viii. 50.

The childlike faith that asks not waits for wonder or for sign. Believes, because it loves aright. Sees things greater, things divine.

Shall we think that gaze shall open wide, And brightest angels to and fro On messages of love shall glide?

"Twixt God and Christ below."—John Keble.

The blessed thing which the Bible calls faith, is a state of the soul in which the image of God become glorious certainties. It matters not how it comes, whether as to Thomas through sight, or whether through the evidence of the Spirit; and yet the faith of which Christ said, "Blessed are they which have not seen and yet have believed," was a spiritual faith.

—Frederick William Robertson.

Mothers Value This Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Goos North For Museum

Dr. R. M. Anderson, of the National Museum, Ottawa, will accompany the 1928 Canadian Arctic expedition on its annual patrol to the points in the northern islands. At points of call he will collect zoological material for the Museum and obtain information on points of interest in these regions.

Minard's Liniment For Blistered Feet.

All previous records were broken by British Columbia's industrial payroll in 1927, when it reached a total of over \$177,000,000.

ECZEMA IN ITCHY PIMPLES

Affected Nearly All of Body. Cuticura Heals.

"Eczema broke out in pimples and affected most all my body. The pimples were not very large but were red and hard. Some of them feasted and then scaled off. The pimples were so itchy and burned so much that I used to wake up in the night and scratch them. My clothing aggravated the breaking out very much."

"I began using Cuticura Soap and Ointment and in four weeks I was completely healed. After using two cakes of Cuticura Soap and two boxes of Cuticura Ointment."

(Signed) Frederick A. Zink, Robinson's Corner, N. S.

Cuticura Soap, Ointment and Tablets are sold by Dr. J. C. Taylor, 1000-1001, "Bathhouse, Ltd., Montreal, Quebec, Canada."

Sample Each Free by Mail. Address: Cuticura Sales Co., 1000-1001, "Bathhouse, Ltd., Montreal, Quebec, Canada."

Minard's Liniment — The Universal Remedy.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you can't use it every day. But it is an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering—Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too: read the book that comes with it.

BIG STONE NEWS

We are pleased to report that Jupiter Pluv. again drenched us with two good heavy rains on the nights of Sunday and Monday of this week.

Settlers, old and new, are frequent callers at Government House, looking over the notices relative to locations in this district.

J. Poockens reports the loss of two valuable horses, struck by lightning, during the electrical storm Sunday night.

J. Bellman, artist, is beautifying the residence and buildings on the farm of O. D. Harrington.

Mr. Middlemiss preached a very impressive sermon to a large gathering in the Clover Leaf school house last Sunday.

Mr. and Mrs. W. S. Falconer and family left Sunday morning for a short visit with relatives at Banff.

This district was well represented at the Youngstown Chautauqua several evenings during the week.

Leo Stroh, third officer on the Harrington boat, has been going around with a decided limp. Leo told the writer that he has a suspicion that one of the hens kicked him when passing near the chicken house.

Ralph Newman and Ed. Stroh, our local branch-busters, returned from the Calgary stampede wiser, but not sadder. One thing they learned in particular was that a good rider is not supposed to hang onto the saddle horn when doing his stuff. The gaudy trappings of the Calgary busters did not impress our young riders, as both of them possess a regular outfit. Now that the brunt of the plowing is over we look forward to seeing many thrilling daredevil deeds put on by the above riders. 'May I be there to see—More anon.

Mr. and Mrs. Powell, accompanied by Mrs. J. Whately, were visitors at Government House one day last week. Mr. Powell contemplates making his future home in this flourishing neighborhood. Arthur Jacobson is a business visitor in Calgary this week. Arthur and his father have turned over a large acreage this summer with the Fordson tractor purchased in the spring.

Allen Bros. have also been making things hum on the Turcotte farm, which they have rented. Howard Parsons, wife and family, called here enroute for the Reaville country, returning same evening.

With the extension of Pool wheat deliveries the roads leading to Chinook and Youngstown were dotted with trucks and wagons hauling out last year's crop.

Geo. H. Such requires the services of a good housekeeper. Now then, girls.

Lord Rodney Signs Pool Contract

Following the example of H. R. H. the Prince of Wales, whose wheat crop from his ranch west of High River is marketed through the Alberta Wheat Pool, Lord Rodney, who farms a large acreage near Fort Saskatchewan, has recently signed one of the new pool contracts. Another British peer who is a member of the Alberta Wheat Pool is the Duke of Sutherland, whose seven-thousand-acre farm at Brooks has been under contract for a number of years.

DRESSMAKING

I am prepared to do Dressmaking and will be pleased to have you call

All Work Guaranteed

MRS. R. BACON
CHINOOK ALBERTA

Migratory Birds Convention Act

A summary of the Migratory Birds Convention Act is given below. This is the law which is based upon the Treaty with the United States. Any enquiries concerning this law may be addressed to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

Open seasons, both dates inclusive:

Saskatchewan—Ducks, Geese and Coots, Sept. 15 to Dec. 31. Wilson's or Jack-snipe, Sept. 15 to Dec. 31.

Alberta—North of the Clearwater and Athabasca Rivers, Ducks, Geese and Coots, Sept. 1 to Dec. 14. Wilson's or Jack-snipe, Sept. 1 to Dec. 14. South of the Clearwater and Athabasca Rivers, Ducks, Geese and Coots, Sept. 15 to Dec. 14. Wilson's or Jack-snipe, Sept. 15 to Dec. 14.

Closed Seasons—There is a closed season in the Provinces of Saskatchewan and Alberta on swans, wood duck, elder duck, cranes, curlew, willet, godwits, upland plover, black-bellied and golden plover, greater and lesser yellow-legs, avocets, dowitchers, knots, oyster-catchers, phalaropes, stilts, surf-birds, turnstones, and all the shore-birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds: aukes, auklets, bitterns, fulmars, gannets, grebes, guillemots, gulls, herons, jaegers, loons, murres, petrels, puffins, shearwaters and terns; and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, catbirds, chickadees, cuckoos, flickers, flycatchers, grosbeaks, hummingbirds, kinglets, martins, meadowlarks, nighthawks or bull bats, nuthatches, orioles, robins, shrike, swallows, swifts, tansagers, titmice, thrushes, vireos, warblers, waxwings, whip-poor-wills, woodpeckers and wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest migratory birds during the closed season. Sale of these birds is forbidden.

The killing, capturing, taking, injuring or molesting of migratory insectivorous and migratory non-game birds is prohibited. The possession of legally taken migratory game birds is allowed in Alberta until March 31, following the open season, and in Saskatchewan until the last day of February following the open season. Daily bag limits in Alberta: Ducks, 30 in one day and not more than 200 of all kinds in a season; Geese, 15; Coots, 25; Wilson's Snipe, 25.

The use of automatic (auto loading), swivel or machine guns, or battery, or any gun larger than number 10 gauge is prohibited and the use of any aeroplane, power boat, sail boat or night light, and shooting from any horse drawn or motor vehicle is forbidden. The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited. Every person who violates any provision of this Act or any regulation shall, for each offence, be liable upon summary conviction to a fine of not more than three hundred dollars and not less than ten dollars, or to imprisonment for a term not exceeding six months or to both fine and imprisonment.

Cereal Man Dies After Long Illness

Harry S. Hill, a resident of Cereal for eleven years, died last Thursday after a lingering illness of four years. For the past two and a half years he has been unable to use his limbs. He leaves a wife and two sons to mourn his death. The funeral was held on Saturday afternoon, under the direction of the Cereal Orange lodge, of which Mr. Hill was a member.

Exhibits For American Fairs

Exhibits of agricultural products and natural resources from Alberta will again be shown this season at a number of the larger fairs throughout the central states by the publicity branch of the Department of Agriculture. Reports from Canadian Government agents indicate that a great deal of interest in Alberta has been shown by farmers throughout the territory visited in this way last year and that immigration to the Province has been materially assisted by the favorable impression created by these exhibits.

The fairs at which the Alberta display will appear during August and September include the following: Mississippi Valley Fair and Exposition, Davenport, Iowa; Hawkeye Fair and Exposition, Fort Dodge, Iowa; Blue Earth County Fair, Mankato, Minn.; Freeborn County Fair, Albert Lea, Minn.; Inter-state Fair, La Crosse, Wis.; Missouri State Fair, Sedalia, Mo.; North Central Kansas Free Fair, Belleville, Kan.; Brown County Tri county Fair, Horton, Kan.; Kansas Free Fair, Topeka, Kan.; and Kansas State Fair, Hutchinson, Kan.

THE LAND TITLES ACT

Mortgage Sale of Valuable Farm Property

UNDER and by virtue of the Powers of Sale provided by the Land Titles Act, under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Acadia Hotel in the Town of Chinook, in the Province of Alberta, on Saturday, the 18th day of August, 1928, at the hour of two o'clock in the afternoon, the following property, namely: The north half of section thirty-two (32), in township twenty nine (29), range seven (7), west of the 4th meridian, reserving unto the Crown all mines and minerals and the right to work the same.

Terms of the sale to be 20 per cent cash at the time of the sale, and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save taxes for the year 1928, and a third crop lease in favor of Charles H. Perry, expiring the 31st day of December A.D. 1929, but terminable by notice between the 1st day of November and the last day of March following in any year.

The vendor is informed that the above property is situated about seven miles from Chinook and that improvements consist of frame house 20x22, frame stable 30x44, and two miles of two wire fence and half mile cross fence. The soil is medium to light clay loam and 175 acres have been broken.

For further particulars and conditions of sale, apply to PORTER & NAISMITH, 301 Grain Exchange Building, Calgary, Alberta.

Dated at Calgary this 11th day of June, A.D. 1928.

Approved
PORTER & NAISMITH,
Vendor's Solicitors.

W. FORBES, Registrar.

Brot Albanach

1. Pretty little Kathleen Kemp dancing the Highland jig at the Highland festival.
2. The Banff Springs Hotel that will become a veritable 'banquet hall' during the forthcoming Scottish gathering. The new swimming pool is glimpsed below the hotel.

Brot Albanach appeared on the 22nd menu of the "Trath Nodh" Bladh bladh air a bhord; air an Snnh lath do'n Nodhheannh Ailios, and if any of those who attended the Highland Gathering and Scottish Music Festival at Banff last year could read that far, they knew that "Gruhan laogh leth bhrughda, agus mullach allan-lichte," was nothing more formidable than broiled galloway liver with bacon. If they ordered it, they will probably go back for more.

The Highland Gathering was a great success last year. This year, between August 31 and September 3, it will be repeated. Banff will be Scotland for a week. Pipes will shriek through the forests and hills; the tartan will colour the trail; and there will be dancing, Highland dancing, and

dance contests—and Caledonia games, tossing the caber, and putting the shot. And in the evenings, music—Scottish music—with famous singers as interpreters. For the first time in Caledonia, for the first time in nearly a hundred years anywhere, Burns' Cantata "The Jolly Beggar" will be presented—Gaelic, and the songs of the Lowland Scots; and on Sunday, at Sun Dance Canyon, a service in the open air. The old Covenanters' tunes will be heard among the hills, and the piper will play the memento to his people.

Paintings and Pageantry—His Royal Highness the Prince of Wales has once more graciously given his patronage to the Banff Highland gathering.
